

INDUSTRY SPEAKERS, TOUR AND WORKSHOP

VIVA

Viva Energy Australia was created from two of the world's foremost energy companies, Shell and Vitol, to deliver premium service and genuine products.

Vitol: The world's largest independent energy trading company. With more than 200 ships at sea at any given time and over 5 million barrels of crude oil and products traded every day, Vitol has the scale and capability to meet Australia's growing demand for energy.

Shell: One of the world's most recognised and respected brands. Shell's reputation for quality and technical innovation is reflected in products that combine performance, efficiency and reliability.

STUDENT HIGHLIGHTS

- Gained an insight into how people work in their work spaces, also about the subjects to choose.
- How big VIVA is and how much work/effort goes into producing petrol and oils
- It was interesting to see how petrol was made and how many stages and people it involved.
- I learnt to always take on opportunities and to do things you love as well as having strong communication towards everyone and teamwork
- I found it interesting how the VIVA women knew how everything works considering the size of the factory
- VIVA: the way they use one product to make lots of different things

- I learnt how important engineers and manufacturers are in daily life. Also how much effort goes into making products
- I learnt that manufacturing businesses are far more complex than they seem. Also, you don't need to know what you want right now. Some of the workers at VIVA didn't know what they wanted to do in high school.
- It was interesting to see the scale of everything at VIVA and how many different roles there were at one place. Also, the number of different pathways people had taken to get their jobs surprised me too.
- I found it interesting to learn about the different sections of VIVA. Also, it was good to find out about what goes into the products we use on a daily basis
